

## Cerefco

Cerefco (Pty) Ltd was established in 1982 to service the foundry, metallurgical, and industrial sectors of the Southern African Market. As the official representative of multiple Inductotherm Group companies—we maintain a large inventory of Inductotherm spares as well as service and supply parts to the 175+ Inductotherm furnaces sold into Southern Africa.

Our services and technical support are available on a 24/7 basis so that we can offer you prompt service and support. Our clients use a wide range of Inductotherm equipment—from 20kW up to 12,000kW.

**THE FIRST  
INDUCTOTHERM  
FURNACE SOLD  
IN SOUTH AFRICA  
WAS IN 1960**

## Inductotherm Group

Inductotherm Group brings together some forty companies strategically located around the world. They all share a focus on serving the metals and materials industry and all are leaders in their respective disciplines.

### Inductotherm

Inductotherm designs and manufactures induction melting, holding, pouring, and heating systems for ferrous and non-ferrous metals. Their products serve foundries, steel mills, and metal processors with equipment like coreless furnaces, power supplies, strip heaters, and automated pouring systems.

### Inductoheat

Inductoheat specializes in induction heat treating and heating systems for components such as gears, shafts, camshafts, and forgings. Their equipment includes billet heaters, shrink-fit systems, and advanced induction hardening machines used in automotive, aerospace, and heavy manufacturing.

### Thermatool

Thermatool provides high-frequency induction welding, heating, and annealing systems for the tube and pipe industry. Their product range includes HF welders, seam annealers, full-body annealers, and quench & temper lines for precision tube fabrication and finishing.
